

# LiFi Cube

LiFi Cube is a plug and play LiFi hotspot or access point for an instant connection to a local network, to the internet, or simply point -to- point. It delivers all the security and performance benefits of LiFi in a portable, flexible package. LiFi enables more reliable, congestion - free communications that offer unprecedented security for a broad range of connectivity applications and use cases. LiFi Cube works with any standalone or built in LiFi client using pureLiFi's latest Light Antenna ONE or a compatible solution.

### Performance Highlights

Model Number	PL11U06
Maximum Data Rate*	350 Mbps
Minimum Distance*	0.7 m
Maximum Distance*	5 m

\*When in use with pureLiFi high speed client.

## High Speed & Low Latency

Using the latest generation infrared transceivers, LiFi Cube delivers a high bandwidth, low latency link that is independent from room lighting.

## Plug & Play

Connect to a local network or to another device using Ethernet for immediate connectivity, then take it with you when you go.

## Adapts to your Space

LiFi Cube rests in an adjustable stand or mounts anywhere from a wall or ceiling to a shelf, tripod or tent pole using the built-in screw mount.

## Military Grade Security

The LiFi Cube offers ultimate privacy and has a near zero electromagnetic signature. LiFi Cube is also open to customisation for secure government and defence networks.
