

LiFi Cube Mini

LiFi Cube is a plug and play LiFi hotspot or access point for an instant connection to a local network, to the internet, or simply point-to-point. It delivers all the security and performance benefits of LiFi in a portable, flexible package. LiFi enables more reliable, congestion-free communications that offer unprecedented security for a broad range of connectivity applications and use cases. LiFi Cube works with any standalone or built in LiFi client using pureLiFi's latest Light Antenna ONE or a compatible solution.

Performance Highlights

Model Number	PL20U01
Maximum Data Rate*	350 Mbps
Minimum Distance*	0.7m
Maximum Distance*	5 m
Size	75 x 95 x 100mm
Weight	700 g

*When in use with pureLiFi high speed client.

High Speed & Low Latency

Using the latest generation infrared transceivers, LiFi Cube delivers a high bandwidth, low latency link that is independent from room lighting.

Plug & Play

Connect to a local network or to another device using Ethernet for immediate connectivity, then take it with you when you go.

Adapts to your Space

LiFi Cube rests in an adjustable stand or mounts anywhere from a wall or ceiling to a shelf, tripod or tent pole using the built-in screw mount.

Military Grade Security

The LiFi Cube offers ultimate privacy and has a near zero electromagnetic signature. LiFi Cube is also open to customisation for secure government and defence networks.
